

INK2MATH: SMART EQUATION SOLVER

Question:

$$x^2 - 5x + 6 = 0$$

Solution:

$$x = [2, 3]$$

Steps to Solve:

1. $x^2 - 5x + 6 = 0$
2. Detected Quadratic Equation (degree 2).
3. Use factorization or quadratic formula.
4. Solutions: $x = 2$, $x = 3$
